INDEPENDENT AUDITOR'S REPORT

The Honorable Ronald Roberts, Mayor and Members of the City Council DeRidder, Louisiana

I have audited the accompanying financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the City of Deridder, Louisiana, as of and for the year ended September 30, 2010, which collectively comprise the City's basic financial statements as listed in the table of contents. These financial statements are the responsibility of the City of DeRidder, Louisiana's management. My responsibility is to express opinions on these financial statements based on my audit.

I conducted my audit in accordance with auditing standards generally accepted in the United States of America, and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that I plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. I believe that my audit provides a reasonable basis for my opinions.

In my opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the City of DeRidder, Louisiana, as of September 30, 2010, and the respective changes in financial position and cash flows, thereof for the year then ended in conformity with accounting principles generally accepted in the United States of America.

In accordance with Government Auditing Standards, I have also issued my report dated February 2, 2011 on my consideration of the City of DeRidder, Louisiana's internal control over financial reporting and on my tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements and other matters. The purpose of that report is to describe the scope of my testing of internal control over financial reporting and compliance and the results of that testing and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with Government Auditing Standards and should be considered in assessing the results of my audit.

Accounting principles generally accepted in the United States of America require that management's discussion and analysis, budgetary comparison information and other postemployment benefits (OPEB) funding schedule on pages 36 through 39 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. I have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to my inquiries, the basic financial statements, and other knowledge I obtained during my audit of the basic financial statements. I do not express an opinion or

The Honorable Ronald Roberts, Mayor and Members of the City Council

provide any assurance on the information because the limited procedures do not provide me with sufficient evidence to express an opinion or provide any assurance.

The City of DeRidder, Louisiana, has not presented management's discussion and analysis that accounting principles generally accepted in the United States has determined is necessary to supplement, although not required to be part of, the basic financial statements.

My audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the City of DeRidder, Louisiana's financial statements as a whole. The combining and individual nonmajor fund financial statements and schedule of per diem paid to board members is presented for purposes of additional analysis and is not a required part of the financial statements. The combining and individual nonmajor fund financial statements and schedule of per diem paid to board members is the responsibility of management and was derived from and relate directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In my opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole.

DeRidder, Louisiana February 2, 2011

Jumul. Windlam, CPA

Reconciliation of the Governmental Funds Balance Sheet to Statement of Net Assets September 30, 2010

Total fund balance - total governmental funds			\$ 4,572,725
Amounts reported for governmental activities in the statement of net assets are different because:			
Capital assets used in governmental activities are not			
financial resources and therefore are not reported in			
the governmental funds balance sheets.			6,899,373
Internal service funds are used to charge the	,		•
costs of certain activities, such as insurance,			
to individual funds. The assets and			
liabilities of the internal service funds are			
included in governmental activities in the			
statement of net assets.			161,359
Interest payable on long-term debt does not require			
current financial resources. Therefore interest			
payable is not reported as a liability in			
governmental funds balance sheet.			(1,599)
Capital assets reported in the proprietary fund	•		
but financed with general obligation debt have			
been transferred to governmental activities			
in the government wide statement of net assets			
in order to show those assets net of related debt			
in the net assets section of the government			
wide statement of net assets.			512,461
Long-term liabilities including bonds payable, compensated			
absences and other post employment benefits are not			
due and payable in the current period and, therefore,			
are not reported in the governmental funds.			
Due within one year	\$	(278,000)	•
Due in more than one year		(1,780,868)	 (2,058,868)
Net assets of governmental activities			\$ 10,085,451

Reconciliation of the Statement of Revenues, Expenditures and Changes in Fund Balance of Governmental Funds to the Statement of Activities

For the Year Ended September 30, 2010

Net change in fund balances - total governmental funds				\$	(580,808)
Amounts reported for governmental activities in the statement of activities are different because:					
Compensated absences reported in the statement of activities do not require the use of current financial resources and therefore are not reported as expenditures in the		•			
governmental funds.					(27,171)
The net effect of various transactions involving capital assets (contributions, trades, etc.) is to increase net assets.			•		27,335
Governmental funds report capital outlays as expenditures. However, in the government-wide statement of activities and changes in net assets, the cost of those assets is allocated over their estimated useful lives as depreciation expense. This is the amount of capital assets recorded in the current period.				,	
General fund	\$	6	12,830		
Special revenue fund		1	16,886		
Capital projects fund		9	98,569		
Other governmental funds			5,795		
					1,734,080
Depreciation expense on capital assets is reported in the government-					
wide statement of activities and changes in net assets, but they					
do not require the use of current financial resources. Therefore,			•		
depreciation expense is not reported as an expenditure in governmental funds.					(432,150)
Accrued interest on long term debt is not shown in the governmental funds.					546
Repayment of bond principal is an expenditure in the governmental funds, but the repayment reduces long-term liabilities in the statement of net assets. This is the amount of bond repayments.					96,000
and the treatment of botto repayments.					20,000
Governmental funds do not report net change in other postemployment benefits (OPEB) obligations. However this obligation does appear in the Statement of Activities since the payable is reported on the Statement of					
Net Assets	•				(598,062)
Internal service funds are used by management to charge the costs of certain activities to individual funds.					
The net income of the internal service funds is reported with governmental activities					4,923
					
Change in net assets of governmental activities					224,693

Notes to the Financial Statements As of and for the Year Ended September 30, 2010

INTRODUCTION

The City of DeRidder was incorporated under the provisions of the Lawrason Act. The City operates under a Mayor-City Council form of government under a home rule charter.

The accounting and reporting policies of the City of DeRidder conform to generally accepted accounting principles as applicable to governments. Such accounting and reporting procedures also conform to the requirements of Louisiana Revised Statutes 24:517 and to the guides set forth in the Louisiana Municipal Audit and Accounting Guide, and to the industry audit guide, Audits of State and Local Governmental Units.

The City is located within Beauregard Parish in the southwestern part of the State of Louisiana and is comprised of approximately 9,700 residents. The governing board is composed of seven elected council members that are compensated for regular and special board meetings. There are approximately ninety-six employees who provide various services to the residents. The City maintains approximately 74 miles of roadways within the city limits.

The City maintains various funds that provide services and benefits to the residents. The general fund provides police and fire protection, and culture and recreational activities. The sales tax fund provides public works of highway and street maintenance and solid waste collection and disposal. The utility fund provides water and sewer services to approximately 4,100 residents. Other funds are established as needed for specific projects undertaken by the City.

GASB Statement No. 14, *The Reporting Entity*, established criteria for determining the governmental reporting entity and component units that should be included within the reporting entity. Under provisions of this Statement, the municipality is considered a primary government, since it is a special purpose government that has a separately elected governing body, is legally separate, and is fiscally independent of other state or local governments. As used in GASB Statement No. 14, fiscally independent means that the municipality may, without the approval or consent of another governmental entity, determine or modify its own budget, levy its own taxes or set rates or charges, and issue bonded debt.

Blended Components Units

Component units that are legally separate from the municipality, but are so intertwined with the municipality that they are, in substance, the same as the municipalities are blended component units. For a component unit to be blended, the organization's board and the municipality must be substantially the same, or the organization must provide services entirely to the municipality and blended with the appropriate municipality funds:

The City of DeRidder had no blended component units as of September 30, 2010.

<u>Discretely Presented Component Units</u>

Component units that are legally separate from the municipality, but are financially accountable to the municipality, or whose relationship with the municipality are such that exclusion would cause the municipality's financial statements to be misleading or incomplete are discretely presented.

The City of DeRidder had no discretely presented component units as of September 30, 2010.

Notes to the Financial Statements (Continued)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A. Government-Wide and Fund Financial Statements

The government-wide financial statements (i.e., the statement of net assets and the statement of changes in net assets) report information on all of the nonfiduciary activities of the primary government. For the most part, the effect of interfund activity has been removed from these statements. Governmental activities, which normally are supported by taxes and intergovernmental revenues, are reported separately from business-type activities, which rely to a significant extent on fees and charges for support.

The statement of activities demonstrates the degree to which the direct expenses of a given function or segment is offset by program revenues. Direct expenses are those that are clearly identifiable with a specific function or segment. Program revenues include 1) charges to customers or applicants who purchase, use or directly benefit from goods, services, or privileges provided by a given function or segment and 2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or segment. Taxes and other items not properly included among program revenues are reported instead as general revenues.

Separate financial statements are provided for governmental funds and proprietary funds. Major individual governmental funds and major individual enterprise funds are reported as separate columns in the funds financial statements.

B. Measurement Focus, Basis of Accounting, and Financial Statement Presentation

The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting, as are the proprietary fund financial statements. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

Governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the government considers revenues to be available if they are collected within 60 days of the end of the current fiscal period. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, debt service expenditures, as well as expenditures related to compensated absences and claims and judgments, are recorded only when payment is due.

Property taxes, franchise taxes, licenses, and interest associated with the current fiscal period are all considered to be susceptible to accrual and so have been recognized as revenues of the current fiscal period. Only the portion of special assessment receivable due within the current fiscal period is considered to be susceptible to accrual as revenue of the current period. All other revenue items are considered to be measurable and available only when cash is received by the government.

The municipality reports the following major governmental funds:

The General Fund is the municipality's primary operating fund. It accounts for all financial resources of the general government, except those required to be accounted for in another fund.

Special Revenue Fund

The Sales Tax Fund accounts for sales tax revenues that are legally restricted to expenditures for specific purposes.

Capital Projects Fund

The Capital Projects Fund is used to account for financial resources to be used for the acquisition or construction of major capital facilities (other than those financed by proprietary funds.)

Notes to the Financial Statements (Continued)

The municipality reports the following major proprietary fund:

The Proprietary Fund accounts for operations (a) where the intent of the governing body is that the costs (expenses, including depreciation) of providing goods or services to the general public on a continuing basis be financed or recovered primarily through user charges, or (b) where the governing body has decided that periodic determination of revenues earned, expenses incurred, and/or net income is appropriate for capital maintenance, public policy, management control, accountability, or other purposes.

Additionally, the government reports the following fund types:

Internal service funds account for services provided to other departments and agencies of the municipality, or to other governments, on a cost reimbursement basis.

Private-sector standards of accounting and financial reporting issued prior to December 1, 1989, generally are followed in both the government-wide and proprietary fund financial statements to the extent that those standards do not conflict with or contradict guidance of the Governmental Accounting Standards Board. Governments also have the option of following subsequent private-sector guidance for their business-type activities and enterprise funds, subject to this same limitation. The government has elected not to follow subsequent private-sector guidance.

As a general rule the effect of interfund activity has been eliminated from the government-wide financial statements. Exceptions to this general rule are payments-in-lieu of taxes and other charges between the governments enterprise operations. Elimination of these charges would distort the direct costs and program revenues reported for the various functions concerned.

Amounts reported as program revenues include 1) charges to customers or applicants for goods, services, or privileges provided, 2) operating grants and contributions, and 3) capital grants and contributions including special assessments. Internally dedicated resources are reported as general revenues rather than as program revenues. Likewise, general revenues include all taxes.

Proprietary funds distinguish operating revenues and expenses from nonoperating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. Charges for services of providing water and sewer services to residents comprise the operating revenue of the City's enterprise fund. Operating expenses for enterprise funds and internal service funds include the cost of sales and services, administrative expense, and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as nonoperating revenues and expenses.

When both restricted and unrestricted resources are available for use, it is the municipality's policy to use restricted resources first, and then unrestricted resources as they are needed.

C. Deposits and Investments

The municipality's cash and cash equivalents are considered to be cash on hand, demand deposits, time deposits and short-term investments with original maturities of three months or less from the date of acquisition. State law and the municipality's investment policy allow the municipality to invest in collateralized certificates of deposits, government backed securities, commercial paper, the state sponsored investment pool, and mutual funds consisting solely of government backed securities.

Investments for the municipality, as well as for its component units, are reported at fair value. The state investment pool (LAMP) operates in accordance with state laws and regulations. The reported value of the pool is the same as the fair value of the pool shares.

Notes to the Financial Statements (Continued)

D. Receivables and Payables

Activity between funds that are representative of lending/borrowing arrangements outstanding at the end of the fiscal year are referred to as either "due to/from other funds" (i.e., the current portion of interfund loans) or "advances to/from other funds" (i.e., the non-current portion of interfund loans). All other outstanding balances between funds are reported as "due to/from other funds." Any residual balances outstanding between the governmental activities and business-type activities are reported in the government-wide financial statements as "internal balances."

Advances between funds, as reported in the fund financial statements, are offset by a fund balance reserve account in applicable governmental funds to indicate that they are not available for appropriation and are not expendable available financial resources.

The City levies taxes on real and business personal property located within the boundaries of the City. Property taxes are levied by the City on property values assessed by the Beauregard Parish Tax Assessor and approved by the State of Louisiana Tax Commission.

The Beauregard Parish Sheriff and Ex-Officio Tax Collector bills and collects property taxes for the City. Collections are remitted to the City monthly. The City recognizes property tax revenues when levied.

Property Tax Calendar				
Assessment date	Thursday, January 01, 2009			
Levy date	Tuesday, June 30, 2009			
Tax bills mailed	Thursday, October 15, 2009			
Total taxes are due	Thursday, December 31, 2009			
Penalties & interest due	Sunday, January 31, 2010			
Lien date	Sunday, January 31, 2010			
Tax sale	Monday, May 31, 2010			

For the year ended September 30, 2010, taxes of 10.02 mills were levied on property with an assessed valuation totaling \$59,999,627, and were dedicated as follows:

	Authorized <u>Millage</u>	Levied <u>Millage</u>	Expiration <u>Date</u>
Taxes due for:	•		Renewed
General corporate tax	7.42	7.42	Annually
Police/Fire capital improvements	2.60	2.60	9/30/2015

All trade and property tax receivables are shown net of an allowance for uncollectibles. Property taxes are collected and remitted by the local sheriff, if taxes are not paid, a sheriff's sale is held and the property is sold to satisfy the taxes due on the property. Due to this, the majority, if not all property taxes are collected, therefore no allowance account for uncollectibles has been established. Water and sewer charges have customer deposits that have been collected in advance therefore the majority of all water and sewer billing is collected or taken out of the customer's deposit, any allowance account would be immaterial, therefore one has not been established.

The following are the principal taxpayers and related property tax revenue for the municipality:

<u>Taxpayer</u>	Type of Business	Assessed Valuation		% of Total Assessed Valuation	Ad Valorem Tax Revenue for Municipality			
Meadwestvaco	Manufacturer	\$	7,193,726	11.99%	\$	72,081		
Ampacet	Manufacturer		3,058,893	5.10%		30,650		
Total		\$	10,252,619	17.09%	\$	10 <u>2,</u> 731		

Notes to the Financial Statements (Continued)

Sales Taxes

The City of DeRidder receives a 1% sales and use tax that is dedicated to constructing, paving, resurfacing and improving streets, sidewalks and bridges; constructing and improving drains and subsurface drainage; and for the purpose of defraying the maintenance expenses thereof; constructing, acquiring and improving public parks and recreational facilities and purchasing and acquiring the necessary land, equipment and furnishing thereof. In addition, it provides funds for the retirement of all public improvement bonds. This tax is for an indefinite period.

An additional 1% sales tax, for a twenty year period ending December 31, 2011, is dedicated and used for the following purposes:

41% for constructing, improving, repairing, operating and maintaining public buildings, public streets and sidewalks; drains and drainage facilities; garbage and solid waste collection and disposal facilities; paying the cost of other public services, including grass cutting; and paying the cost of improving or extending city utilities to encourage and induce the location of or additions to industrial enterprises having economic impact upon the city;

55% to pay the cost of providing public safety and fire and police protection services and improving, repairing, operating and maintaining sewers and sewerage collection and disposal works, including the acquisition of furnishings and equipment for any of said purposes;

4% to pay the cost of constructing, improving, repairing, operating and maintaining public parks and recreational facilities and purchasing and acquiring the necessary land, equipment and furnishing thereof. In addition, it provides funds for the retirement of all public improvement bonds.

The City of DeRidder also collects a 1/4% sales and use tax with the proceeds to be dedicated and used solely for the purpose of supplementing the salaries and benefits of policemen and firemen and improving police and fire protection facilities, including the acquisition of equipment and vehicles for such purpose. This tax has no term limit.

E. Prepaid Items

Certain payments to vendors reflect costs applicable to future accounting periods and are recorded as prepaid items in both government-wide and fund financial statements.

F. Restricted Assets

Certain resources in the enterprise fund have been set aside for the repair, maintenance and replacement of the water and sewer systems of the City. These resources are classified as restricted assets because their use is limited.

A payment of \$100 per month is deposited into a State of Louisiana reimbursement account. The account was established to reimburse the state their cost associated with the widening of Highway 171 in prior years. This account is restricted and may be called by the state at their discretion.

Cash collected from utility fund customers as deposits against future utility bills are classified as restricted assets and are held by the City in custodial cash accounts entitled "Customer Deposits".

G. Capital Assets

Capital assets, which include property, plant, equipment, and infrastructure assets (e.g., roads, bridges, sidewalks, and similar items), are reported in the applicable governmental or business-type activities columns in the government-wide financial statements. Capital assets are capitalized at historical cost or estimated cost if historical cost is not available. Donated assets are recorded as capital assets at their estimated fair market value at the date of donation. The municipality maintains a threshold level of \$5,000 or more for capitalizing capital assets.

Notes to the Financial Statements (Continued)

According to GASB 34 the City of DeRidder was not required to retroactively report infrastructure assets in its financial statements, therefore, these assets have not been reported in the financial statements.

The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend assets lives are not capitalized.

Major outlays for capital assets and improvements are capitalized as projects are constructed. Interest incurred during the construction phase of capital assets of business-type activities is included as part of the capitalized value of the assets constructed. The total interest expense included during the current fiscal year was \$13,601. No interest was included as part of the cost of capital assets under construction in connection with the City's construction projects.

All capital assets, other than land and work in progress, are depreciated using the straight-line method over the following useful lives:

<u>Description</u>	Estimated Lives
Roads, bridges, and infrastructure	40-50 years
Land improvements	20-50 years
Buildings and building improvements	20-50 years
Furniture and fixtures	5-15 years
Vehicles	5-10 years
Equipment	3-15 years

H. Compensated Absences

The City of DeRidder's recognition and measurement criterion for compensated absences follows:

On July 1, 1996, the City enacted new legislation concerning sick leave pay and unpaid vacation. Full time employees earn vacation leave at varying rates depending upon length of service, which also may be accumulated up to a maximum of 160 days. Upon death, retirement, or separation of service from the City, an employee may receive their entire accumulated sick leave pay if he chooses to draw it out over regular pay periods. If the employee chooses to receive the pay in a lump sum he will receive 50% of the accumulated pay. In addition, upon retirement, unused sick leave is used in the retirement benefit computation as earned service.

On March 28, 1994, the sick leave policy was amended to reflect that each employee of the City would receive 4 hours of sick leave per pay period (13 days per year). As an exception, firemen working 53 hours per week will receive 10 hours of sick leave per month. Upon termination (voluntary or involuntary) an employee will receive full pay for accumulated sick leave not to exceed a 60-day limit (480 hours) with payment made by an installment plan based on the hourly rate at retirement.

No sick leave credit hours accumulated under the old sick leave policy will be lost. Upon retirement or termination, remuneration will be made to those employees who have accrued sick leave under the old policy. This payment will be made in installments and capped at the hourly rate as of December 31, 1993.

GASB Statement No. 16 provides that vacation leave and other compensated absences with similar characteristics should be accrued as a liability as the benefits are earned by the employees if both of the following conditions are met:

- 1. The employees' rights to receive compensation are attributable to services already rendered.
- 2. It is probable that the employer will compensate the employees for the benefits through paid time off or some other means, such as cash payments at termination or retirement.

Notes to the Financial Statements (Continued)

GASB Statement No.16 provides that a liability for sick leave should be accrued using one of the following termination approaches:

- An accrual for earned sick leave should be made only to the extent it is probable that the benefits will
 result in termination payments, rather than be taken as absences due to illness or other contingencies,
 such as medical appointments and funerals.
- 2. Alternatively, a governmental entity should estimate its accrued sick leave liability based on the sick leave accumulated at the balance sheet date by those employees who currently are eligible to receive termination payments as well as other employees who are expected to become eligible in the future to receive such payments.

The entire compensated absence liability is reported on the government-wide financial statements. For governmental fund financial statements, the current portion of unpaid compensated absences is the amount that is normally expected to be paid using expendable available financial resources. These amounts are recorded in the account "compensated absences payable" in the fund from which the employees who accumulated leave are paid. The noncurrent portion of the liability is not reported.

I. Long-Term Obligations

In the government-wide financial statements, and the proprietary funds types in the fund financial statements, long-term debt and other long-term obligations are reported as liabilities in the applicable governmental activities, business-type activities, or proprietary fund type statement of net assets. Bond premiums and discounts, as well as issuance costs, are deferred and amortized over the life of the bonds using the effective interest method. Bonds payable are reported net of the applicable bond premium or discount. Bond issuance costs are reported as deferred charges and amortized over the term of the related debt.

In the fund financial statements, governmental fund types recognize bond premiums and discounts, as well as bond issuance costs, during the current period. The face amount of the debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources while discounts on debt issuances are reported as other financing uses. Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as debt service expenditures.

J. Fund Equity

In the fund financial statements, governmental funds report reservations of fund balance for amounts that are not available for appropriation or are legally restricted by outside parties for use for a specific purpose. Designations of fund balance represent tentative management plans that are subject to change.

K. Extraordinary and Special Items

Extraordinary items are transactions or events that are both unusual in nature and infrequent in occurrence. Special items are transactions or events within the control of the municipality, which are either unusual in nature or infrequent in occurrence.

L. Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America require management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues, expenditures, and expenses during the reporting period. Actual results could differ from those estimates.

Notes to the Financial Statements (Continued)

2. STEWARDSHIP, COMPLIANCE AND ACCOUNTABILITY

BUDGET INFORMATION The municipality uses the following budget practices:

- The Director of Finance submits to the Mayor and City Council a proposed operating budget no later than
 fifteen days prior to the beginning of each fiscal year. The operating budget includes proposed
 expenditures and the means of financing them. For the fiscal year beginning October 1, 2008 and ending
 September 30, 2010 the budget was submitted to the City Council on August 11, 2008 and the public
 hearing was called for. After the public hearing was held, the budget was adopted by ordinance of the City
 Council.
- 2. Budgetary appropriations lapse at the end of each fiscal year.
- Budgets for the general and special revenue funds are adopted on a basis consistent with generally
 accepted accounting principles (GAAP). Budgeted amounts are as originally adopted, or as amended by
 the City Council.
- 4. Amendments to the budget are approved by the City Council by a formal adoption of an ordinance. The original budget is amended as necessary and all amendments are reflected in the budget comparisons in the financial statements.
- 5. Formal budgetary integration is employed as a management control device during the year for the General Fund and Special Revenue Funds. Formal budgetary integration is not employed in the Debt Service Funds because effective budgetary control is alternatively achieved through bond indenture provisions.

EXCESS OF EXPENDITURES OVER APPROPRIATIONS The following individual funds had actual expenditures over budgeted appropriations for the year ended September 30, 2010.

	Original	Final		Un	favorable
<u>Fund</u>	Budget	Budget Actual		V	/ariance
General Fund	\$ 5,310,900	\$ 5,186,500	\$ 5,188,575	\$	2,075
Sales Tax Fund	2,602,400	2,436,900	2,468,773		31,873

3. CASH AND CASH EQUIVALENTS

At September 30, 2010, the municipality has cash and cash equivalents (book balances) totaling \$6,963,641 as follows:

\$ 67,858
129,482
159,690
4,524,148
2,082,113
 350
\$ 6,963,641
\$

These deposits are stated at cost, which approximates market. Under state law, these deposits (or the resulting bank balances) must be secured by federal deposit insurance or the pledge of securities owned by the fiscal agent bank. The market value of the pledged securities plus the federal deposit insurance must at all times equal the amount on deposit with the fiscal agent. These securities are held in the name of the pledging fiscal agent bank in a holding or custodial bank that is mutually acceptable to both parties.

Notes to the Financial Statements (Continued)

At September 30, 2010, the municipality has \$4,918,787 in deposits (collected bank balances). These deposits are secured from risk by \$1,127,099 of federal deposit insurance and \$3,791,688 of pledged securities held by the custodial bank in the name of the fiscal agent bank (GASB Category 3).

Even though the pledged securities are considered uncollateralized (Category 3) under the provisions of GASB Statement 3, R.S. 39:1229 imposes a statutory requirement on the custodial bank to advertise and sell the pledged securities within 10 days of being notified by the municipality that the fiscal agent has failed to pay deposited funds upon demand.

The City also had invested \$2,082,113 in the Louisiana Asset Management Pool (LAMP), a local government investment pool. In accordance with GASB Codification Section I50.126, the investment in LAMP as of September 30, 2010 is not categorized in the three risk categories provided by GASB Codification Section I50.125 because the investment is in the pool of funds and therefore not evidenced by securities that exist in physical or book entry form.

LAMP is administered by LAMP, Inc., a non-profit corporation organized under the laws of the State of Louisiana. Only local government entities having contracted to participate in LAMP have an investment interest in its pool of assets. The primary objective of LAMP is to provide a safe environment for the placement of public funds in short-term, high quality investments. The LAMP portfolio includes only securities and other obligations which local governments in Louisiana are authorized to invest in accordance with LSA - R.S. 33:2955. Accordingly, LAMP investments are restricted to securities issued, guaranteed, or backed by the U.S. Treasury, the U.S. Government, or one of its agencies, enterprises, or instrumentalities, as well as repurchase agreements collateralized by those securities.

Effective August 1, 2001, LAMP's investment guidelines were amended to permit the investment in government-only money market funds. In its 2001 Regular Session, the Louisiana Legislature (Senate Bill No. 512, Act 701) enacted LSA-R.S. 33:2955(A)(1)(h) which allows all municipalities, parishes, school boards, and any other political subdivisions of the State to invest in "Investment grade (A-1/P-1) commercial paper of domestic United States corporations." Effective October 1, 2001, LAMP's Investment Guidelines were amended to allow the limited investment in A-1 or A-1+ commercial paper.

The dollar weighted average portfolio maturity of LAMP assets is restricted to not more than three months, and consists of no securities with a maturity in excess of 397 days. LAMP is designed to be highly liquid to give its participants immediate access to their account balances. The investments in LAMP are stated at fair value based on quoted market rates. The fair value is determined on a weekly basis by LAMP and the value of the position in the external investment pool is the same as the value of the pool shares.

LAMP, Inc. is subject to the regulatory oversight of the state treasurer and the board of directors. LAMP is not registered with the SEC as an investment company.

4. RECEIVABLES

The receivables of \$934,347 at September 30, 2010, are as follows:

Class of receivable	Ge	neral Fund	P	roprietary <u>Fund</u>	Special Revenue Fund		Total

Public works	\$ 112,200
Public safety	200,683
General administration	29,232
Recreation	52,247
Unallocated	 <u>3</u> 7,788
Total	\$ 432,150

6. CONSTRUCTION COMMITMENTS

The municipality has active construction projects as of September 30, 2010. The City had the following construction projects. The Lift Station Valve Project provides upgrades to the sewer lift station. The East Park Basketball Pavilion will provide a basketball court for recreation at East Park. The Sidewalk Project provides new sidewalks to existing streets. The LCDBG Street Project provides for maintenance and overlay of streets within the City. The 8th Street Washington Avenue Turning Lane Project provides for a wider turning radius for larger trucks to be diverted from downtown areas. The Farmers Market Project provides a market where local farmers can sell their produce to the public. At year-end the commitments with contractors were as follows:

Projects	Spen	t to Date	Remaining		
8th Street Washington Avenue Turning Lane	\$	475	\$	96,525	
Farmers Market		55		89,945	
LCDBG Street Project		5,795		414,205

Total	\$	54,000	\$	1,225,819	\$	200,000	\$	579,099	\$	2,058,918	

Certificates of Indebtedness are comprised of the following individual issues at September 30, 2010:

<u>Certificates of Indebtedness – Governmental Funds:</u>

\$245,000 Series 2006 Certificates of Indebtedness due in annual installments of \$44,000 to \$54,000 through August, 2011; interest at the rate of 3.95%

\$54,000

Bonded debt is comprised of the following issue at September 30, 2008:

Bonded Debt - Governmental Funds:

\$500,000 Series 2005 Water Improvement Bonds due in annual installments of \$45,000 to \$55,000 through August 2014; interest at the rate of 3.875%

\$200,000

At September 30, 2010, the City of DeRidder accumulated \$15,615 in the debt service fund for future debt requirements. The annual requirements to amortize all bonds and certificates of indebtedness outstanding at September 30, 2010, for the City of DeRidder is as follows:

Notes to the Financial Statements (Continued)

Year Ending September 30,	rincipal ayments	nterest syments	 Total
2011	\$ 99,000	\$ 9,567	\$ 108,567
2012	50,000	6,006	56,006
2013	50,000	4,069	54,069
2014	55,000	2,131	 57,131
Total	\$ 254,000	\$ 21,773	\$ 275,773

In accordance with R.S. 39:562, the municipality is legally restricted from incurring long-term bonded debt in excess of 35% of the assessed value of taxable property. At September 30, 2010, the statutory limit is \$21,324,921, and outstanding bonded debt totals \$200,000.

10. RESTRICTED NET ASSETS/RESERVED FUND BALANCE

The Proprietary Fund - The proprietary fund had restricted net assets available as follows:

	Utility <u>Fund</u>			
Restricted assets:				
Replacement, extension and contingency accounts	\$	1,878,204		
State contract funds		35,374		
Customers deposits		210,735		
Total	\$	2,124,313		
Less:				
Liabilities payable from restricted assets:				
Customers deposits	\$	145,402		
Contracts payable		30,500		
Total	\$	175,902		
Restricted net assets	_\$_	1,948,411		

The Debt Service Fund - The debt service fund had reserved fund balance available as follows:

Reserved for debt service \$ 269,615

The General Fund – The general fund had reserved fund balance available as follows:

Reserved for perpetual care \$ 789,175

11. RETÎREMENT SYSTEMS

Substantially all employees of the City of DeRidder, are members of the following statewide retirement systems: Municipal Employees Retirement System of Louisiana, Municipal Police Employees Retirement System of Louisiana and the Fire Fighters Retirement System of Louisiana. These systems are cost-sharing, multiple-employer defined benefit pension plans administered by separate boards of trustees. Pertinent information relative to each plan follows:

A. Municipal Employees Retirement System of Louisiana (System)

Plan Description. The System is composed of two distinct plans, Plan A and Plan B, with separate assets and benefit provisions. All employees of the municipality are members of Plan B.

Notes to the Financial Statements (Continued)

All permanent employees working at least 35 hours per week who are not covered by another pension plan and are paid wholly or in part from municipal funds and all elected municipal officials are eligible to participate in the System. Under Plan B, employees who retire at or after age 60 with at least 10 years of creditable service at or after age 55 with at least 30 years of creditable service are entitled to a retirement benefit, payable monthly for life equal to 2% of their final-average monthly salary in excess of \$100 for each year of creditable service. Furthermore, employees with at least 10 years of creditable service, but less than 30 years, may take early retirement benefits commencing at or after age 60, with the basic benefit reduced 3% for each year retirement precedes age 62, unless he has at least 30 years of creditable service. In any case, monthly retirement benefits paid under Plan B cannot exceed 100% of final-average salary. Final-average salary is the employee's average salary over the 36 consecutive or joined months that produce the highest average. Employees who terminate with at least the amount of creditable service stated above, and do not withdraw their employee contributions, may retire at the ages specified above and receive the benefit accrued to their date of termination. The System also provides death and disability benefits. Benefits are established or amended by state statute.

The System issues an annual publicly available financial report that includes financial statements and required supplementary information for the System. That report may be obtained by writing to the Municipal Employees Retirement System of Louisiana, 7937 Office Park Boulevard, Baton Rouge, Louisiana 70809, or by calling (225) 925-4810.

Funding Policy. Under Plan B, members are required by state statute to contribute 5.0% of their annual covered salary and the City of DeRidder is required to contribute at an actuarially determined rate. The current rate is 6.75% of annual covered payroll. Contributions to the System also include one-fourth of 1% (except Orleans and East Baton Rouge parishes) of the taxes shown to be collectible by the tax rolls of each parish. These tax dollars are divided between Plan A and Plan B based proportionately on the salaries of the active members of each plan. The contribution requirements of plan members and the City of DeRidder are established and may be amended by state statute. As provided by R.S. 11:103, the employer contributions are determined by actuarial valuation and are subject to change each year based on the results of the valuation for the prior fiscal year. The City of DeRidder's contributions to the System under Plan B for the years ending September 30, 2010, 2009 and 2008, were \$93,313, \$92,533, and \$94,216, respectively, equal to the required contributions for each year.

B. Municipal Police Employees Retirement System of Louisiana (System)

Plan Description. All full-time police department employees engaged in law enforcement are required to participate in the System. Employees who retire at or after age 50 with at least 20 years of creditable service or after age 55 with at least 12 years of creditable service are entitled to a retirement benefit, payable monthly for life, equal to 3 1/3% of their final-average salary for each year of creditable service. Final-average salary is the employee's average salary over the 36 consecutive or joined months that produce the highest average. Employees who terminate with at least the amount of creditable service stated above, and do not withdraw their employee contributions, may retire at the ages specified above and receive the benefit accrued to their date of termination. The System also provides death and disability benefits. Benefits are established or amended by state statute.

The System issues an annual publicly available financial report that includes financial statements and required supplementary information for the System. That report may be obtained by writing to the Municipal Police Employees Retirement System of Louisiana, 8401 United Plaza Boulevard, Baton Rouge, Louisiana 70809-2250, or by calling (225) 929-7411.

Funding Policy. Plan members are required by state statute to contribute 7.5% of their annual covered salary and the City of DeRidder is required to contribute at an actuarially determined rate. The current rate is 25.00% of annual covered payroll. The contribution requirements of plan members and the City of DeRidder are established and may be amended by state statute. As provided by R.S. 11:103, the employer contributions are determined by actuarial valuation and are subject to change each year based on the results of the valuation for the prior fiscal year. The City of DeRidder's contributions to the System for the years ending September 30, 2010, 2009 and 2008, were \$159,520, \$107,183, and \$133,370, respectively, equal to the required contributions for each year.

Notes to the Financial Statements (Continued)

C. Firefighters' Retirement System of Louisiana

Plan Description. Membership in the Louisiana Firefighters' Retirement System is mandatory for all full-time firefighters employed by a municipality, parish, or fire protection district that did not enact an ordinance before January 1, 1980, exempting itself from participation in the System. Employees are eligible to retire at or after age 55 with at least 12 years of creditable service or at or after age 50 with at least 20 years of creditable service. Upon retirement, members are entitled to a retirement benefit, payable monthly for life, equal to 3 1/3 % of their final-average salary for each year of creditable service, not to exceed 100 percent of their final-average salary. Final-average salary is the employee's average salary over the 36 consecutive or joined months that produce the highest average. Employees who terminate with at least 12 years of service and do not withdraw their employee contributions may retire at or after age 55 (or at or after age 50 with at least 20 years of creditable service at termination) and receive the benefit accrued to their date of termination. The System also provides death and disability benefits. Benefits are established or amended by state statute.

The System issues an annual publicly available financial report that includes financial statements and required supplementary information for the System. That report may be obtained by writing to the Firefighters' Retirement System, P. O. Box 94095, Baton Rouge, LA, 70804; or by calling (225) 925-4060.

Funding Policy. Plan members are required by state statute to contribute 8.00% of their annual covered salary and the City of DeRidder is required to contribute at an actuarially determined rate. The current rate is 21.50% of annual covered payroll. The contribution requirements of plan members and the City of DeRidder are established and may be amended by state statute. As provided by Louisiana Revised Statute 11:103, the employer contributions are determined by actuarial valuation and are subject to change each year based on the results of the valuation for the prior fiscal year. The City of DeRidder's contributions to the System for the years ending September 30, 2010, 2009, and 2008, were \$120,705, \$87,865, and \$82,857, respectively, equal to the required contributions for each year.

12. Postemployment Health Care and Life Insurance Benefits

The City provides certain continuing health care and life insurance benefits for the City's retired employees. Substantially, all of the City's employees become eligible for these benefits if they reach normal retirement age while working for the City. Those benefits for retirees are provided through Humana, United Healthcare and Dearborn National whose monthly premiums are paid by the City. The City pays the premiums on a "pay-as-yougo" basis. For the year ended September 30, 2010, there were thirty-two retirees and the costs of their benefits totaled \$106,242.

The City's Annual Required Contributions ("ARC") is an amount actuarially-determined in accordance with GASB 45, which is being implemented prospectively for the year ended September 30, 2010. The ARC represents a level of funding that, if paid on an ongoing basis, would cover normal cost each year and amortize the beginning Unfunded Actuarial Liability ("UAL") over a period of 30 years. A 30 year, closed amortization period has been used with a level-dollar amortization factor. The total ARC for the fiscal year 2010 is \$802,244 which consists of normal cost of \$418,733 and amortization of UAL of \$383,511.

Since this is the first year of implementation, no information for prior years is presented.

The following table presents the City's OPEB obligation for the year ended September 30, 2010.

Beginning OPEB obligation at October 1, 2009	\$ 726,543
Annual Required Contribution	802,244
Interest on prior year obligation	29,062
ARC adjustment	(42,016)
Annual OPEB cost	789,290
Less: current year premiums paid	106,242
Increase in net OPEB obligation	 683,048
Ending net OPEB obligation at September 30, 2010	\$ 1,409,591

Notes to the Financial Statements (Concluded)

Utilizing the pay-as-you-go method, the City contributed 13.5% of the annual OPEB cost during 2010.

Actuarial Methods and Assumptions. Actuarial valuations of an ongoing plan involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality, and the healthcare cost trend. Amounts determined regarding the funded status of the plan and the annual required contributions of the employer are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future. The schedule of funding progress, presented as required supplementary information following the notes to the financial statements, presents multiyear trend information that shows whether the actuarial value of plan assets is increasing or decreasing over time relative to the actuarial accrued liabilities for benefits.

Projections of benefits for financial reporting purposes are based on the substantive plan (the plan as understood by the employer and plan members) and include the types of benefits provided at the time of each valuation and the historical pattern of sharing of benefit costs between the employer and plan members to that point. The actuarial methods and assumptions used include techniques that are designed to reduce short-term volatility in actuarial accrued liabilities and the actuarial value of assets, consistent with the long term perspective of the calculations. In the September 30, 2010 actuarial valuation, the "Closed Group" method was used, employees and retirees as of the valuation date were used and employees to be hired in the future were not considered. The actuarial assumptions included a 4.0 percent investment rate of return (net of administrative expenses) and an annual healthcare cost trend rate of 6.5% initially, reduced by decrements to an ultimate rate of 4.5% after seventy-seven years. The RP-2000 mortality table projected to 2010 using Scale AA was used in the actuarial calculation. An inservice-related turnover scale was used for MERS and FFRS participants and an age-related turnover scale was used for MPERS participants. The remaining amortization period at September 30, 2010 was 28 years.

REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS

The Honorable Ronald Roberts, Mayor and the Members of the City Council DeRidder, Louisiana

I have audited the financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the City of DeRidder, Louisiana, as of and for the year ended September 30, 2010, which collectively comprise the City of DeRidder, Louisiana's basic financial statements and have issued my report thereon dated February 2, 2011. I conducted my audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Internal Control Over Financial Reporting

In planning and performing my audit, I considered the City of DeRidder, Louisiana's internal control over financial reporting as a basis for designing my auditing procedures for the purpose of expressing my opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the City of DeRidder, Louisiana's internal control over financial reporting. Accordingly, I do not express an opinion on the effectiveness of the City of DeRidder, Louisiana's internal control over financial reporting.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis.

My consideration of internal control over financial reporting was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over financial reporting that might be deficiencies, significant deficiencies, or material weaknesses. I did not identify any deficiencies in internal control over financial reporting that I consider to be material weaknesses, as defined above.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the City of DeRidder, Louisiana's financial statements are free of material misstatement, I performed tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of my audit and, accordingly, I do not express such an opinion. The results of my tests disclosed no instances of noncompliance or other matters that are required to be reported under Government Auditing Standards.

The Honorable Ronald Roberts, Mayor and Members of the City Council

This report is intended solely for the information and use of management, others within the organization, the City Council, and the Louisiana Legislative Auditor and is not intended to be and should not be used by anyone other than these specified parties, although under Louisiana Revised Statute 24:513, this report is distributed by the Louisiana Legislative Auditor as a public document.

DeRidder, Louisiana February 2, 2011
