Notes to the Financial Statements
As of and for the Year Ended December 31, 2005

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The Tensas Parish 911 Emergency Communications District was created by the Tensas Parish Police Jury, as authorized by Louisiana Revised Statute 33:9101, on May 23, 2000, for the purpose of providing a primary three-digit emergency number through which emergency services can be quickly and efficiently obtained. The district is governed by a seven member board appointed by the police jury. Board members serve without benefit of compensation.

A. REPORTING ENTITY

As the governing authority of the parish, for reporting purposes, the Tensas Parish Police Jury is the financial reporting entity for Tensas Parish. The financial reporting entity consists of (a) the primary government (police jury), (b) organizations for which the primary government is financially accountable, and (c) other organizations for which nature and significance of their relationship with the primary government are such that exclusion would cause the reporting entity's financial statements to be misleading or incomplete.

Governmental Accounting Standards Board (GASB) Statement No. 14 established criteria determining which component units should be considered part of the Tensas Parish Police Jury for financial reporting purposes. The basic criterion for including a potential component unit within the reporting entity is financial responsibility. The GASB has set forth criteria to be considered in determining financial accountability. This criteria includes:

- 1. Appointing a voting majority of an organization's governing body, and
 - a. The ability of the police jury to impose its will on that organization and/or
 - b. The potential for the organization to provide specific financial benefits to or impose specific financial burdens on the police jury.

TENSAS PARISH 911 EMERGENCY COMMUNICATIONS DISTRICT

St. Joseph, Louisiana Notes to the Financial Statements (Continued)

- 2. Organizations for which the police jury does not appoint a voting majority but are fiscally dependent on the police jury.
- 3. Organizations for which the reporting entity financial statements would be misleading if data of the organization is not included because of the nature or significance of the relationship.

Because the police jury created the district, appoints the commissioners of the district, and has the ability to impose its will on the district, the district was determined to be a component unit of the Tensas Parish Police Jury, the financial reporting entity. The accompanying financial statements present information only on the funds maintained by the district and do not present information on the police jury, the general government services provided by that governmental unit, or the other governmental units that comprise the Tensas Parish financial reporting entity.

B. FUND ACCOUNTING

The district uses funds and account groups to report on its financial position and the results of its operations. Fund accounting is designed to demonstrate legal compliance and to aid financial management by segregating transactions related to certain government functions or activities.

A fund is a separate accounting entity with a self-balancing set of accounts that comprises its assets, liabilities, fund equity, revenues, and expenditures. An account group, on the other hand, is a financial reporting device designed to provide accountability for certain assets and liabilities (general fixed assets and general long-term obligations) that are not recorded in the "funds" because they do not directly affect net expendable available financial resources. They are concerned only with the measurement of financial position, not with the measurement of results of operations.

Funds are classified into three categories; governmental, proprietary, and fiduciary. Each category, in turn, is divided into separate "fund types." Governmental funds are used to account for a government's general activities, where the focus of attention is on the providing of services to the public as opposed to proprietary funds where the focus of attention is on recovering the cost of providing services to the public or other agencies through service charges or user fees. Fiduciary funds are used to account for assets held for others. The district's current operations require only the use of governmental funds (General Fund). Annual property assessments approved by voters of the district and interest earnings on investments are accounted for in this fund. General operating expenditures are paid from the fund.

St. Joseph, Louisiana Notes to the Financial Statements (Continued)

C. BASIS OF ACCOUNTING

The financial reporting treatment applied to a fund is determined by its measurement focus. All governmental funds are accounted for using a current financial resources measurement focus. With this measurement focus, only current assets and current liabilities generally are included on the balance sheet. Operating statements for these funds present increases (i.e., revenues and other financing sources) and decreases (i.e., expenditures and other financing uses) in net current assets.

The modified accrual basis of accounting is used for reporting all governmental fund types. Under the modified accrual basis of accounting, revenues are recognized when susceptible to accrual (i.e., when they become both measurable and available). "Measurable" means the amount of the transaction can be determined and "available" means collectible within the current period or soon enough thereafter to be used to pay liabilities of the current period. The district uses the following practices in recognizing and reporting revenues and expenditures:

Revenues

Fees, charges, and commissions for services are recognized in the month received by the telephone companies.

Based on the above criteria, fees, charges, and commissions for services have been treated as susceptible to accrual.

Expenditures

Expenditures are generally recognized under the modified accrual basis of accounting when the related fund liability is incurred.

D. BUDGET PRACTICES

A preliminary budget for the ensuing year is prepared by the board of commissioners and made available to the public. The budget is then adopted during the regular December meeting. The proposed budget for the General Fund is prepared on the modified accrual basis of accounting. The budget is established and controlled by the board of commissioners at the object level of expenditure. Appropriations lapse at year-end and must be reappropriated for the following year to be expended. All changes in the budget

TENSAS PARISH 911

EMERGENCY COMMUNICATIONS DISTRICT

St. Joseph, Louisiana

Notes to the Financial Statements (Continued)

must be approved by the board of commissioners. The district does not use encumbrance accounting in its accounting system.

Formal budgetary integration is employed as a management control device during the year. Budgeted amounts included in the accompanying financial statements include the original adopted budget amounts.

E. CASH AND CASH EQUIVALENTS

Under state law, the district may deposit funds within a fiscal agent bank organized under the laws of the State of Louisiana, the laws of any other state in the union, or the laws of the United States. The district may invest in certificates and time deposits of state banks organized under Louisiana law and national banks having principal offices in Louisiana.

At December 31, 2005, the district has cash and cash equivalents (book balances) totaling \$139,368.

These deposits are stated at cost, which approximates market. Under state law, these deposits, or the resulting bank balances, must be secured by federal deposit insurance or the pledge of securities owned by the fiscal agent bank. All deposits are fully secured by federal deposit insurance at December 31, 2005.

2. CHANGES IN GENERAL FIXED ASSETS

The district has no fixed assets at December 31, 2005.

3. LITIGATION AND CLAIMS

The district is not involved in any litigation at December 31, 2005, nor is it aware of any unasserted claims.

St. Joseph, Louisiana Notes to the Financial Statements (Continued)

4. IMPLEMENTATION OF WIRELESS E911 SERVICES

Louisiana R. S. 33:9109 states, in pertinent part, "In any district having a population of less than twenty thousand persons as of the most recent federal decennial census, proceeds of the service charge, less any collection charge which the wireless service supplier is authorized to retain, may be used for any lawful purpose of the district." U. S. Census Bureau statistics indicate the latest decennial census of the District to be 6,618. Therefore, of the \$44,141 in revenues derived from service charges related to Wireless E911 Services, all of the proceeds have been used in accordance with the general operations of the District.

While the District has not yet implemented Wireless E911 services at this time, management plans to form cooperative endeavor agreements with neighboring districts to combine resources and provide the service within the District.
